Installing 12Blocks on a Mac

1.Install Propeller Font

Download this:
http://www.parallax.com/Portals/0/Downloads/sw/propeller/Parallax.ttf
and click on it to install it:

2.Install FTDI USB Driver

Download the OSX VCP driver for your system from here:
http://www.ftdichip.com/Drivers/VCP.htm
Install it:

3. Install Mono Framework

Download the latest stable Mono Framework (2.10.x) for OSX from here
http://www.go-mono.com/mono-downloads/download.html and install:

5. Download 12Blocks for Mac from:http://12blocks.com/download

Once downloaded, click on 12Blocks.VVV.tgz (where VVV is a version number) to install the application. Click on the newly installed 12Blocks application to run it.

6. If you wish to uninstall 12Blocks, drag the application to the trash
